REPLY TO AN INTERVIEW SUMMARY

Sir:

This is in response to an Interview Summary mailed for an interview held on July 30, 2008. A response to a final action is concurrently filed with a Request for continued Examination under 37 CFR §1.114. A reply to an interview summary for an interview made on July 10, 2008 is further concurrently filed.

R-E-M-A-R-K-S

The Applicant has contacted the Examiner to have an interview to discuss a possible amendment following the issuance of a final rejection for the above-identified patent application.

The interview was held on July 30, 2008.

The participants for the interview were:

- M. Jean Geoffrion, *Applicant*;
- M. Alexandre Abecassis, (Reg. N°58,883), *Applicant's representative*; and
- M. Michael E. Keefer, *Examiner*.

The Applicant has provided the Examiner, *inter alia*, with a draft of a claim for the purpose of discussion. More precisely, the draft Claim 1 was Claim 1 on file with the added limitation "*further wherein said data identifying said detected neighboring node and said data identifying said given node comprise OSI layer 3 data*".

The Examiner has suggested that the limitation should be amended to read "*further wherein said data identifying said detected neighboring node and said data identifying said given node comprise IP address identification data*" in order to be fully supported, in his opinion, by the disclosure.

The Examiner has further pointed out that the draft Claim 1, if amended to be fully supported by the disclosure, may overcome the art of record but will require further search and consideration.

Respectfully submitted,

GEOFFRION, Jean
